

South Fraser Perimeter Road PROJECT

North Surrey

Lane Closure Traffic Advisory

Updated February 2, 2011

Lane closure on 136th Street between 115th Avenue and 116th Avenue

Construction activities will occur on 136th Street between 115th Avenue and 116th Avenue. Construction activities will include placement of pre-load materials and utility relocation followed by road work.

Anticipated delays are less than two minutes, due to the following:

- Truck access and egress, resulting in minor traffic delays; or
- Lane-closures, resulting in single-lane alternating traffic.

Hours of work will be 7:00am to 5:00pm, Monday to Saturday starting the week of February 7, 2011 until approximately mid-July, 2011. Please obey all construction signs and traffic control personnel.

A key goal of the South Fraser Perimeter Road Project is to manage traffic flow during construction to ensure predictable travel times and minimize disruption for commuters, goods movers, residents and cyclists. If you have any questions please use the contact information below:
