Program Start:	The CRD taxi camera program started September 10, 2008. As of March 31, 2009, each CRD taxicab licensee must have a taxi camera installed and operational in each taxicab that is used.	

Taxi camera equipment may only be installed and operated in vehicles when the licensee is in compliance with applicable taxi camera rules, standards and orders of the Passenger Transportation Board.

This local taxi camera program is established for driver and passenger safety. To protect the privacy of drivers and passengers, only the local police agencies have the authorization, tools and passwords that are needed to access taxi camera images.

More information about taxi camera programs and requirements is posted at: <http://www.th.gov.bc.ca/ptb/cameras.htm>.
