

Z-RECORD GRAPHIC INDEX INTRODUCTORY NOTE

Z-Record Definition

A site-specific, restricted use, traffic sign used for unique field situations when no existing standard or supplemental sign provides the required message. All Z-Record signs are developed and approved by the Senior Traffic Engineer (STE). New placement of an existing Z-Record sign requires a Regional Traffic Engineer's (RTE) review and approval prior to installation.

NOTE: A 'Zz-Record' refers to the latest generation of Z-Record signs and simply identifies the section in which the sign occurs as part of its sign number (IE: Zr-062-1 as a regulatory sign or Zw-063-5 as a warning sign).

Use and Application of this Graphic index

This index provides thumbnail graphics of all approved Z-Record signs as of September 2009. Index application notes:

- The sign graphics are not to scale.
- Due to limitation for text space – sign sizes (by number) are not shown. Individual tab and overlay (OL) numbers are not identified when the tab/OL appear in a series.
- This PDF file is designed to be printed DOUBLE-SIDED.

The Z-Record Index is for reference only. The designs shown are approved for use in special application by the STE. The indexes are not intended for fabrication or ordering purposes. New sign placement using existing Z-Record designs require Regional Traffic Engineer (RTE) review and approval and all new Z-Record designs require STE development and approval.
